## **U.S. Retirement & Benefits Partners Launches Decision Support Tool**

### *DecisionGuide for Health Care*

**Iselin, NJ, January 11, 2018** – U.S. Retirement & Benefits Partners (USRBP) announced today the launch of DecisionGuide, a unique and unbiased decision support tool that helps employees with the challenge of selecting the most suitable health plan option.

DecisionGuide is a web-based software that employs mathematical models and algorithms to help individual consumers and their families identify their best choice among the health insurance plans available to them through their employers. It is based on credible normative data from millions of consumers, advanced statistical analysis and decades of medical and health insurance expertise. In just a few minutes, employees answer four simple multiple-choice questions and instantly receive their plan and price comparison and recommendation.

DecisionGuide enables employees to confidently make smarter health plan choices that target their expected needs, often resulting in a cost savings for them and the employer. It is an available feature in the InRoll+ benefits administration and enrollment system offered by U.S. Employee Benefits Services Group (USEBSG), a division of USRBP.

Chuck Andolina, Senior Vice President of USEBSG said, “DecisionGuide, unlike other tools, is fully integrated into the InRoll+ Benefits Administration System and gives employees a great option to get some real guidance on a very important decision.”

“We are committed to bringing the most modern tools and services to help our employer and employee clients make fully informed decisions,” said Mark Skinner, President and CEO of USRBP.
