

ACA COMPLIANCE SERVICES

The Affordable Care Act (ACA) creates a vast array of regulations that organizations like yours must keep track of and adhere to. Our experts understand the full scope of the ACA landscape and can support you through a comprehensive set of compliance services. Using our cloud-based technology platform and our dedicated service team, we help you stay up to date on ACA law, comply with all regulations, and avoid costly penalties.

Our Services Include:

Compliance Communications

We assist with the mass distribution of mandatory notices across your organization.

With access to all necessary documents, notices, and reports, you can ensure that ACA required communications reach your employees.

We also provide ACA Toolkits with information and customizable HR documents for use at your organization.

Exposure Analytics

Our Exposure Analytics are designed to help employers develop a blueprint for the ACA based on their own data.

Using your historical data, our team can help determine any prior exposure to fines or penalties, and can also provide guidance on the best and most efficient way to move forward.

Functional Data

We track your employee data to help you with administration tasks and facilitate responses to government inquiries and filings.

With a handle on the data at your organization, we help you make proactive decisions that are in line with ACA law.

Concierge Services

Our compliance experts are available to guide you through the ACA landscape. We help you correctly administer plans to your employees and keep you up-to-date by notifying you of changes to regulations and mandates.

Through our bilingual ACA Helpline, you and your employees have access to our live ACA experts through phone and email.

Service Highlights

about our ACA
Compliance
Services

Technology

Our clients are given access to our secure web portal where they can complete and submit paperwork, upload data, view forms, download notices and more.

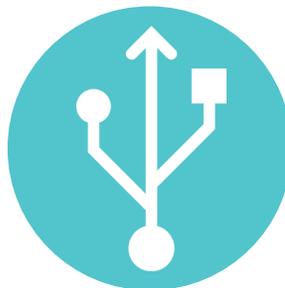

Universal Data

Designed to solve challenges with data requirements. Load data from multiple sources with no cutting and pasting; our system converts the required template.

Education

Timely news updates and regularly published webinars, white papers and other resources.

Universal Application

Built into the system is an online questionnaire that gathers all plan-specific information needed for services.
