**U.S. Retirement Partners Announces Addition of Market Management System
*System Offers Turnkey Package to Help Manage School District Information***

Iselin, NJ, January 4, 2013 – U.S. Retirement Partners (USRP) announced today that it has introduced its Market Management System intended for use by USRP’s Partners and Advisors. USRP is a national network of benefits and retirement planning specialists serving the K-12 education market.

The Market Management System (MMS) is an online data warehouse of school district information for states throughout the U.S., consisting of both governmental and user-entered data. This information includes employee and participant statistics, administrators and key contacts, and employer plans overviews. This comprehensive system, available on the MyUSRP website, provides Partners and Advisors with an easy-to-use online tool to organize and manage their business activities.

“We are pleased to provide our Partner Firms and Advisors with another tool to help them better manage information about the school districts and employees they serve. The MMS is a valuable resource that will help allocate participant communication, education, and service resources more efficiently,” said James F. Schlucter, Senior Vice President and National Director of Practice Management of USRP.

“With the introduction of the Market Management System and its hundreds of intrinsic data points, we now have another state-of-the-art tool in place that will help us better interact with both school district officials and individual participants,” said Mark M. Skinner, President and CEO of USRP.
